Methodology

In 2020, the National Shooting Sports Foundation (NSSF) contracted Sports Marketing Surveys for an online consumer survey on modern sporting rifles (MSRs) that was last carried out in 2013. Due to the COVID pandemic and personnel changes at NSSF, this survey was not able to be administered until December 2021. The aim is to provide the NSSF and manufacturers insights on current consumer needs and uses of MSRs as well as educate those influencing public policy in the effort to preserve our constitutional rights.

The online survey covered various aspects of MSR ownership, behavior, and attitudes. The NSSF promoted the survey via a partner email distribution list. A random drawing to win one of four \$250 Mastercard prepaid gift cards was included to incentivize participation. The term “Modern Sporting Rifle” was clearly defined as AR- or AK-platform rifles such as AR-15, AR-10, AK-47, AK-74 and did not include non-rifle firearms such as AR pistols, etc. Photographs of both AR- and AK-platform MSRs were shown on the survey landing page. All responses from those under 18 years old or said they did not own at least 1 MSR were removed from the analysis.

The survey was live from December 9, 2021 to January 2, 2022.

- **Completed Surveys: 2,421**
- **Usable responses for analysis: 2,185**
